

## Penetration Tester

As a member of the Versos team we strive to become our clients' trusted advisor, a position that enables us to fully understand our client's needs and empower them to achieve their business and security objectives.

To perform this job successfully, you must be able to provide extremely high quality work products and client support.

### Job requirements:

- Perform research, analysis, and testing of network, application, physical and procedural vulnerabilities via vulnerability assessment, penetration test, war dialing, and/or social engineering
- Clearly outline and portray test findings via well documented reports
- Deliver professional on-site and remote briefings to client based on results of testing
- Assist client with questions regarding vulnerabilities and the remediation efforts involved in eliminating them
- Review IDS and or firewall signature / rule sets and make recommendations for improvement
- Improve customer deliverables through report template and procedural updates
- Perform other duties as assigned

**Qualifications and Experience:**

- Four (4) years of experience performing vulnerability assessments and Pentest.
- Direct experience with vulnerability assessments including network, web app, banking app and mobile app penetration testing.
- Demonstrated experience exploiting vulnerabilities and performing exploit research.
- Demonstrated experience interviewing technical and non-technical system Personnel.
- Demonstrated experience reviewing security documentation and operational procedures to determine system vulnerabilities.
- Industry standard certification in vulnerability analysis, ethical hacking techniques, or penetration testing.
- Demonstrated experience explaining security issues to non-security focused development teams.
- Strong written and oral communication skills.
